

Idaho Section of the American Water Resources Association "Meet the Professional"

Saturday, February 3, 2018

9:00 AM to 4:00 PM

Brink Room of the Boise State University Student Union Building

Science and Engineering is a lot of fun, but how do you make it a career? Here's a chance to hear the stories of people working as scientists and engineers. Local professionals will talk about the paths that got them to where they are today. You will hear how they chose their profession, what they do on an average day, and what have they learned along the way. Come hear the story of their journeys. Twenty-four professionals (two per 30 minute period) have volunteered to spend time with you. Check the schedule for their names and professions.
